EXPERIENCE

APRIL 2021 – PRESENT
Software Engineer | Accenture, Cybergate Tower 2, Edsa Avenue, Mandaluyong City, Philippines

As a Software Engineer at Accenture, I developed web applications for large-scale use by integrating software components into fully functional platforms. I documented and maintained software functionality, ensuring high standards of accuracy and attention to detail, while tailoring and deploying software tools, processes, and metrics to enhance development efficiency. I created user experiences that fetched, parsed, and formatted analytic data, relaying it into React components. Additionally, I refactored, reviewed, and approved code before deployment, fostering teamwork and supporting team members. I provided technical support for existing web applications, developed new features, and ensured responsiveness and accessibility standards.

Handled various clients and projects including:

Oil and Gas Company: Built systems to manage and analyze data for oil and gas companies and etc.

FEBRUARY 2019 – MARCH 2021
Web Developer | Forecasting and Planning Technologies Inc., Sen. Gil Puyat Avenue, Makati, Philippines

As a Web Developer at Forecasting and Planning Technologies Inc., I engaged in front-end and back-end development and database management. I identified, diagnosed, and resolved web application problems, including SQL queries and design processes. I designed and developed web applications according to client specifications, with a focus on responsive design standards. Additionally, I supported the team in client presentations, demonstrating strong verbal and written communication skills. I worked as a productive and positive team member, contributing to the design, coding, testing, and debugging processes.

Handled various clients and projects including:

HRIS: Enhanced and supported HR systems to improve functionality and user experience.

Real Estate: Developed solutions for real estate management and client engagement.

Manufacturing: Implemented applications to facilitate manufacturing workflows and data management.
